Съхранете настоящия документ и го използвайте в случай на необходимост!
Приложете документ, потвърждаващ покупката!

Потребителят потвърждава, че е получил продукта в оригинална опаковка, нов, неизползван, в комплект с италиански сифон и шаблон (за моделите мивки за модул не е необходим шаблон) и е информиран за начина на транспортиране, разпребиване, монтаж, функциониране и поддръжка на продукта.

Получил съм Гаранционна карта, Декларация за съответствие и Инструкции за монтаж, Поддръжка и употреба.

fat® *Настроение за вашия дом*

Keep this document for future use!
Enclose it along with the purchase invoice, ticket or receipt!

The client confirms, that he received the product in a new, original package, along with an Italian siphon, and a paper template (kitchen sinks for modules are not completed with paper templates) and it was explained to him the means of transporting, handling, ways of perforating the faucet hole, installing, and use.

I hereby declare that I have received the warranty certificate, declaration of conformity, mounting instructions and maintenance.

fat® *Feel good at home*

Pastrati acest certificat de garantie si folositi-l daca este cazul!
Atasati la certificatul de garantie documentul care atesta achizitia (factura/chitanta etc)!

Consumatorul confirma ca a primit produsul in ambalaj original, nou, intact, impreuna cu sifonul Italian si sablon (chiuvetele pentru masca, nu sunt completate cu sablon), si i sa explicat modul de transportare, manipulare perforare a gaurii pentru baterie, montare si folosire a produsului.

Am primit Certificatul de garantie, Declaratia de conformitate, Instructiunile de montare si folosire si Instructiunile de utilizare si intretinere.

fat® *Bună dispoziție în casa Dumeavoastră*

5 years warranty
for Cast marble and Granixit

10 years warranty
for FATGRANIT

/valid from the date of sale/

- The sink warranty does NOT apply to changes in appearance and surface as result of normal wear and tear over time due to the intended usage, which do not trouble the functionality of the product - such as: wear, scratches and abrasions.
- The warranty of the sink covers defects of the material, arising as a result of the production process - such as cracks due to internal tension, unevenness of the surfaces, contacting with the kitchen worktop etc.

Complains are not accepted in the following cases:

- When, on the moment of complaint the purchasing document/receipt along with warranty certificate (in full) is not being provided by claimer.
- When the damage is due to careless actions, handling and storage, transport or natural disasters.
- When not following entirely the mounting instructions, faucet hole perforation, usage and maintenance, recommended by producer.
- In case there is an attempt for repairing by unauthorized person,
- When the product is not being used as intended - the sink is intended for domestic, not for industrial usage.
- In case, that hot utensils are placed on the sink surface.
- When the damage is caused due to impact or friction with a sharp and / or heavy object.

ATTENTION! The warranty does not apply siphon and its equipment - plugs, fittings, pipes and flexible hose.

Seller's contractual obligation:

- To fill in all the blanks in the warranty certificate, and to ensure that upon handling the product, has to be:
- properly packed
- completed with Italian siphon and paper template /kitchen sinks for modules with codes 218 and 219 are not completed with paper templates/
- To advise the customer to transport the product in a careful manner/ following the package markings /symbols/.
- The seller is obliged to the client and the producer is obliged to the seller for any defects of the product complained within the warranty period.
- To cover possible expenses for the fixing/replacing operations, storage packing/transporting, and to return to the customer within the statutory period
- To replace the product when this: cannot be fixed (service confirmed), when the cost of repairing is over the price of the product, or to return the value in money or others means, when replacing is impossible.
- To extend warranty when the product was not in function (from the date of complain till returning it to the user functioning).
- In an event of complaint to fill in form (available with the seller) and to affix it to the warranty certificate, becoming an integral part of it.

Client's contractual obligation:

- To transport the sink in a careful manner, following the package markings/symbols, and use the product according to the instructions written in the warranty form.
- To allow access of a representative of the seller (service team), for picking up/repairing the product on the spot, in his location.
- The above represent agreement between parts, according to the laws of consumer protection in use, during purchase.

DECLARATION OF PERFORMANCE N: 1.1 / 22.03.2024

- Unique identification code of product type: Composite kitchen sinks - Polymermamor, Granixit, Fatgranit - models: 201, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 241, 242, 243, 244, 245; 247, 248, 249;
- Type, batch or serial number or any other element allowing identification of the construction product as required under Article 11(4):

Composite kitchen sinks

- Intended use or uses of the construction product in accordance with the applicable harmonized technical specification as foreseen by manufacturer: **Preparation of food, dishwashing and discharge of domestic wastewater (PWD)**
- Name, registered trade name or registered trade mark and contact address of manufacture as required under Article 11(5): **FAT EOOD, Plovdiv Region, Rodopi Municipality 4019 Branipole, Gerena Area N: 977, tel. + 359 32 67 22 30, web: www.fat-bg.com, e-mail: office_bg@fat-bg.com**
- Where applicable, name and contact address of the authorized representative whose mandate cover the tasks specified in Article 12(2):

Non applicable

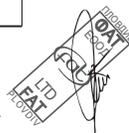

- System or systems of assessment and verification of constancy of performance of the construction product as set out in CPR(305/2011/EU), Annex V: **system N°4**
- In case of the declaration of performance concerning a construction product covered by a harmonized standard: **EN 13310:2015**
- In case of the declaration of performance concerning a construction product, for which it was issued European Technical Assessment: **Not applicable**
- Declared performance:

Essential characteristics	Result	Harmonised standard
Cleanability (CA)	Pass	EN 13310:2015
Load resistance (LR)	Pass	
Durability (DA)	Pass	

- The performance of the product identified in points 1 and 2 is in conformity with the declared performance in point 9
This declaration of performance is issued under the sole responsibility of the producer identified in point. 4:

Signed for and on behalf of the manufacturer by

Manager FAT Ltd.
Atanas Petkov

The manufacturer reserves the right to modify products, accessories and this document at any time without prior notice!

Material:

Polymermamor (Cast Marble) – composite material with main ingredients natural marble powder (80%) and polyester resin. The coating is a transparent, chemical resistant sanitary gel-coat.

Granixit – composite material with the same basic ingredients as by Polymermamor, but in the gel-coat covering are added specific granules with high hardness and great color variety. This additive provides higher resistance to chemical and mechanical influences and enables great color diversity.

FAGRANITE is a composite material of 80% natural quartz /the hardest part of the granite/ and 20% resins.

Instructions for use and maintenance of the kitchen sinks FAT

Dear customers,
The compliance with the instructions for use and maintenance will provide a long life and good vision for your sink.

Cast Marble/Granixit sinks

The heavy kitchenware often has rough/sharp surfaces and edges – use a suitable protective pad to protect the sink bottom

- Falling of sharp and heavy objects in/on the sink can damage its surface.
- Do not place hot kitchenware directly from the oven on the sink – risk on damage for the surface coating.
- Clean daily the sink with a soft sponge and dish soap, then rinse with warm water, if necessary, we recommend using of degreaser and anti-limescale preparation
- Wipe with a soft dry to prevent the formation of limestone and stains.
- For persistent stains, rub the area with a soft sponge, using any cleaning agents (without abrasive) or agents for limestone cleaning available on the market . After finish the cleaning rinse thoroughly with water.

ATTENTION! Do not use any abrasive materials or sharp objects for cleaning the sink – it may damage the surface. The specific lay-up of the Fat sinks does not allowed the generation and retention of contaminants.

Cleaning and maintenance of FATGRANIT composite sink

MAINTAINING A GRANITE SINK IS EASY IF IT'S REGULARLY CLEANED.

The longer the stains stay on the sink, that harder it would be to get rid of them.

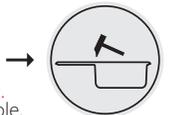

Here are some other advises from us for removing other pollutions, stains, colorizations or traces of metal objects.

- Don't place hot kitchen utensils directly from the stove on the sink – there is a risk of damage surface - deformation, staining, even cracking
- Don't not use your sink as a cutting board
- To get rid of stains and/or lime scale incrustation, spread the detergent evenly with the abrasive part of the cleaning sponge over the dry part of the sink, rub it and let it sit for about 10 minutes. After that rinse with water and dry it out.
- For more stubborn stains – repeat and let the detergent sit for about 15-20 minutes.
- For getting rid of traces, caused by metal objects over the sink surface, use an abrasive cleaning detergent with a creamlike consistency. Dry out the surface of the sink, spread the detergent and let it sit for about 15 minutes. With the abrasive part of the cleaning sponge thoroughly rub the surface. Rinse with water and dry out.

ATTENTION! While cleaning do not use aggressive chemicals that contain caustic soda, formic acid and others similar to that kind. Also do not use highly corrosive detergents – there is a risk of damaging the sink surface – decolorization or bleaching.

Instruction for drilling faucet holes

- Remove the sink from the box, and place with face heading up, on a stable surface.
Faucet holes will be perforated before installing the sink into the kitchen worktop.
- Kitchen sinks FAT have pre fixed faucet holes. Choose the ones you prefer.
- With the sharp edge of a small hammer hit a few times only in the marked center.
- !!!Perforating the sink/knocking the marked center will take place only on the upper side surface (face of the sink).
- Continue knocking with light hits from center of the hole to the edge of it, until forming the final form of the hole.
- Leftover pieces of material/dust may be smoothed with sand paper, sand razor, or any appropriate abrasive.
- If, after perforating the faucet hole is wished re-packing and transporting the product, it is needed to clean the functional side of the sink.

Instruction for installation the sink in the kitchen countertop

- Place the paper template on the countertop and draw the contour.
- The cutting process have to be made inside the marked contour /so that line remains visible on the worktop/, use an electric chainsaw.
Make first a hole in one of the corners of the contour, then continue with cutting from this hole.
- Check by placing the sink in the newly formed opening whether it meets the sink's dimensions, if ok - remove the sink and clean both contact surfaces - of the sink and the kitchen board with degreaser/alcohol. Carefully apply silicone (we recommend only transparent sanitary silicone) on both surfaces.
- Place the sink carefully into the opening, press, and level it with the wall or the countertop.
- Cut the remains of the silicone adhesive with a spatula or any other instrument not very sharp. Pay attention at the integrity of the kitchen board during mounting.
- After few minutes clean entirely the adhesive/silicon traces from the board. If necessary clean with a soft cloth.
- After the final drying of the silicone adhesive (please check the drying time on the package) you can use the sink.

Mounting instruction for undermount sink /product code 221, 222, 232, 236, 237.

- Use the paper template for correct drawing the place for cutting on the kitchen worktop.
- Cut the kitchen worktop with a proper instrument according the material of the worktop.
- For fixing the sink use polyurethane glue, follow thee instructions of the producer of the glue for the relevant material of your worktop.

The models 241-245 are suitable for multi-functional installation - inset, undermount and flush-mount.

Therefore, these models are accompanied by two paper templates, each one labeled for its purpose.

For flush-mount Installation follow the steps below:

- Outline and cut a hole in the countertop, using the appropriate template.
- Place the sink in the hole and draw a contour tightly around the board, lying on the counter.
- Remove the sink and cut the worktop on the outside of the line (so adding about 1 mm distance to avoid damaging the sink by inserting it into the hole). It is necessary to form a step, where the sink stands at the same level as the counter.
- The height of the sink board is 7 mm. – for the depth of the step, consider this size and the type and amount of glue/sealant, used for fixing the sink.

Mounting instruction for module sink /product code 218 and 219/

- When having kitchen modules with the side measurements of 50/55 cm, mount-it according to the below instructions /from points 3 to 5/.
- When having kitchen modules with the side measurements of 45 cm, remove the protection, plank/backboard (if necessary), which is placed in the back side of the module (if there).
- Clean the down side of the kitchen sinks with a soft cloth and spirit/alcohol.
- Apply a layer of silicone/adhesive on the upper side of the module (after being cleaned) and place the sink.
- Connection between board and sink shall be made with a standard aluminum decorative profile and silicone/adhesive.
